Depth Interval (ft bgs)	Interval Top Elevation (ft MSL)	Description	Lab Sample ID*
-------------------------------	--	-------------	----------------------

Test Trench- LF-TT-01

Ground Surface	Lower tier of landfill; Large pieces of concrete debris on surface	
0 - 2	Grayish brown poorly sorted Silt and Sand, loose, dry, no odor.	NA
2 - 15	Grayish brown Silty Sand and Gravel, loose, dry, no odor. Debris: concrete, bricks, scrap metal, glass bottles, paper, insulation, wood, plastic garbage bags.	
> 15	Grayish brown poorly sorted Sand and Gravel, loose, wet.	

Note: Final dimensions: 30' long x 4' wide x 16' deep. Northeast edge of test trench is within the lower tier of the landfill north of SEA-601. Waste found in first tier and ends at edge of the slope. Photo-documented by Mike Morris. Air monitoring conducted by Chad Kelly.

* No waste soil or leachate samples collected from LF-TT-01

Test Trench- LF-TT-02

Ground Surface	Lower tier of landfill; brush, scattered surface debris	GW-LE3-LF
0 - 1	Grayish brown poorly sorted Silt and Sand, loose, dry, no odor (cover material).	
1 - >15	Buried waste including: Hose, wood, plastic bags, plastic strips. Waste buried to > 15 feet - Excavator could not reach to bottom of waste.	

Note: Final dimensions: 36' long x 4' wide x 16' deep. Northeast edge of test trench is within the lower tier of the landfill between SEA-601 and SEA-602. Waste found in first tier and ends at edge of the slope. Photo-documented by Mike Morris. Ground water leachate (GW-LE03-LF) sample collected from LF-TT-02. Air monitoring conducted by Chad Kelley.

Test Trench- LF-TT-03

Ground Surface	Lower tier of landfill; Scattered surface debris	
0 - 1	Grayish brown poorly sorted Silt and Sand, loose, dry, no odor.	NA
2 - 13	Buried waste including: blue plastic strips, dried paint, tires, hose, plastic jugs, and piping/conduits. Water encountered within the buried waste at a depth of approximately 6 feet below the ground surface.	

Note: Trench 3 split in two parts on the north and south sides of the haul road in the vicinity of monitoring well P-8. Final dimensions: North side: 12 feet x 4 feet x 13 feet deep. South side: 12 feet x 4 feet x 13 feet deep. Edge of waste encountered at south end of trench. * No waste soil or leachate samples collected from test trench. Photo-documented by Mike Morris. Air monitoring conducted by Chad Kelley.

Test Trench- LF-TT-05

Ground Surface	South side of haul road near retaining wall; scattered debris in vicinity (tires, scrap metal, etc)	
0 - 2	Grayish brown poorly sorted Silt and Sand, loose, dry, no odor.	NA
3 - 9	Section 1: Buried waste including: plastic, nylon strips, hose, plastic bags. Section 2: Buried waste consisting predominantly of buried concrete. Water was encountered at a depth of approximately 6 feet from the surface.	
9-12	Grayish brown poorly sorted Silt and Sand, loose, wet.	NA

Note: Final Dimensions: Section 1 (north side) 10' long x 4' wide x 12' deep. Section 2 (south side) 15' long x 4' wide x 12' deep. Industrial/municipal wastes encountered in Section 1; Concrete (demolition debris) encountered in Section 2. Photo-documented by Mike Morris. Air monitoring conducted by Chad Kelley.

* No soil waste or leachate samples collected from LF-TT-05.

Depth Interval (ft bgs)	Description	Lab Sample ID
Test Trench- UI-TT-03		
Ground Surface	Mounded area above ground surface covered with vegetation. Large amount of surface debris is present: scrap metal, rusted household appliances such as refrigerators and stoves, rusted/crushed 55 gal drums, and tires.	
0 - 8	Brown silt and fine sand, well sorted, loose, moist, no odor/staining noted. Debris similar to surface debris, but in addition: metal piping, bricks, wire, car parts, large pieces of concrete, cinder blocks, and large tank (estimated to be 250 gal. Tank was not removed.)	SO-W04-UI SO-FD02
> 8	Below tank, similar materials, water table present. Excavation ceased; debris extended to top of water table.	NA

Note: Final dimensions: 27' long x 8' wide x 8' deep. TT3 is located at the southeast end of Pond A where it meets the old access road, and is oriented in the northeast/southwest direction. On 8/15, TT3 was extended approximately another 20' in the west/southwest direction. Additional debris found included a water heater, railroad ties, pipe, and small tanks. Buried debris appeared to extend under the currently used access road between TT1 and TT3. The lateral extent of buried waste was explored in this area. Photo-documented by Mike Morris & Steve Scheidt. Air monitoring conducted by Chad Kelly.

Depth Interval (ft bgs)	Description	Lab Sample ID*
----------------------------	-------------	----------------

Test Trench- UI-TT-04

Ground Surface	Vegetated mound of soil/debris consisting mostly of tires. Brown silt and sand, loose, moist, no odor/staining noted. Pond E ground surface littered with tires.	
0 - 8	Dark grey to brown silty sand and gravel, loose, dry, no odor. Similar demolition debris found (see TT1 - TT3): pipe, brick, tires, scrap metal, car parts, bed springs and a heater tank.	NA
8 - 12	Buried waste extends below water table. Soil SAA & saturated. Side of TT4 extending into low area southwest of Pond E; below water table are a large number of tires. Central area adjacent to Pond E was dug into and more tires were found, approximately 3 - 4' deep.	NA

Note: The ground surface in and around Pond E is littered with tires, and exploratory digging yields buried tires at least 3 - 4' bgs, and extends below water table. Entire Pond E area appears to hold buried tires and debris. The ground surface visibly "bounced" throughout the Pond E area when driven over by the excavator. Photo-documented by Mike Morris & Steve Scheidt. Air monitoring conducted by Chad Kelly. * No soil waste or leachate samples collected from UI-TT-04.

Test Trench- UI-TT-05		
Ground Surface	Large vegetated mounded area. Aerosol cans of "Cough whip" dated 1965 and a needleless syringe plunger were found in the area.	
0 - 6	Light grey/brown Silt and fine Sand, loose, dry, no odor/staining.	NA
6 - 10	Grey/brown Silt and Sand, loose, moist, no odor/staining noted. Debris: plastics, wires, glass, plastic doll parts, pipe, unidentified cohesive, white granular material, plastic bag labeled "Union Carbide - Polyethylene," and unidentified metal machine parts.	NA
10 - 15	Dark grey Silt and Sand, loose, moist, strong organic/decay odor and black/purple staining. Additional debris: rubber, tires, machine parts, string, unidentified burned material, wire/cable insulation, glass vials, glass bottles, and syringe needles. Glass vials labeled "Abbot Laboratories" and "Sterile Sodium Chloride for Injection." A chunk of material was closely investigated consisted of rust stained deteriorated plastic bags, material, and an aggregate of hollow-point needles.	NA

Note: Final dimensions: 30' long x 6' wide x 15' deep. Trench is located on the berm of the depression southeast of the abandoned excavator. Photo-documented by Mike Morris and Steve Scheidt. Air monitoring conducted by Chad Kelley.

Test Trench- UI-TT-07		
Ground Surface	Vegetated berm.	
0 - 2	Berm contains burnt and unburnt waste, plastics, cardboard, paper, wood, glass and metal scrap. Water table encountered at 2'.	NA
2 - 11	Area of TT7 extended towards central depression surrounded by TT5, TT6, and TT8. Little to no soil. Waste completely saturated with water. Depth of waste below 11 ft undetermined. Neoprene electrical wire insulation, clear plastic sheeting, rubber strips, garden hose, wooden 2 x 4's, tires, and wastes such cans and an old Tabasco sauce bottle. Strong odors: hydrocarbon H ₂ S, and decayed organics. Leachate is dark grey color.	NA

Note: Extent of waste could not be determined in the north direction. Excavation of berm would break small ponded area on the other side. Final dimensions: Approximately 25' long x 7' wide x 11' deep. Air monitoring conducted by Chad Kelly.

----------------------------	-------------	----------------

Test Trench- UI-TT-08

Ground Surface	Moderate vegetation on small mounded berm. Debris such as wood, tires, and rusted appliances.	
0 - 5.5	Debris found: garden hose, plastics, tires, cans, vinyl tarp. Soil had strong odors: decayed organics, and similar to burnt plastics.	NA
5.5 - 8	Silt and Sand. Black staining.	NA

Note: Final dimensions: 12' long x 6' wide x 8' deep. Extent of waste found on southeastern edge of trench. Air monitoring by Chad Kelly. * No soil waste or leachate samples collected from UI-TT-08.

----------------------------	-------------	----------------

Test Trench- UI-TT-09

Ground Surface	Some surface debris noted: tire, crushed empty drum, and a pipe. Vegetated.	
0 - 9	Light brown Silt and Sand, loose, dry, no odor staining. Minimal debris: a tire, PVC pipe fragments and some wood pieces.	NA
9 - 12	Brown Silty Sand, moderately cohesive, moist, no odor, some light orange and dark grey banding/mottling or staining.	NA

Note: Final dimensions: 16' long x 5' wide x 12' deep. TT9 located 150' west/northwest from Pond A piezometer. Photo-documented by Stephen Scheidt. Air monitoring by Chad Kelly. Refer to S.S. field book for trenching activities log. * No soil waste or leachate samples collected from UI-TT-09.

Depth Interval (ft bgs)	Description	Lab Sample ID
Test Trench- UI-TT-10		
Ground Surface	Vegetated berm top. Little debris on surface.	
0 - 3	Light brown Silt and fine Sand, well sorted, loose, no odor staining. Some debris: pipe, wood, plastic, vinyl strips, and municipal waste items.	NA
3 - 16	Groundwater encountered at 4' BGS. Contents include plastic toys, pipe, wire, plastic sheeting, vinyl strips, rubber strips, electrical insulation, glass bottles, scrap metal, rubber garden hose, unidentified materials/objects, propane cylinder and wood. Waste saturated with water, gray leachate. Slight hydrocarbon odor, dark gray to reddish gray stained soil.	SO-W02-UI GW-LE02-UI

Note: Waste depth ranged from 4' to 16' bgs. TT10 consisted of several small test trenches and therefore do not have length and width measurements. Trenching was photo-documented by Steve Scheidt and air monitoring conducted by Chad Kelly. Refer to S.S. fieldbook for trenching activities log.

----------------------------	-------------	---------------

Test Trench- UI-TT-11

Ground Surface	Vegetated berm top. Some debris: pipe, scrap metal, and plastic.	
0 - 1	Light brown Silt and Sand, loose, dry, no odor, orange rust staining. Debris increasing with depth immediately upon excavation: rusted pipe and plastic.	NA
1 - 9	Debris and waste extending into water table 4' bgs. Rubber hose, rusted metal, pipe, car parts, cylinders, canisters, plastic, and paper.	NA

Note: TT11 adjacent to TT10 to the southwest. Dimensions: Approximately 20' long x 7' wide x 9' deep. Depth of buried waste could not be determined due to high groundwater in test trench. Trenching was photo-documented by Steve Scheidt and air monitoring conducted by Chad Kelly. Refer to S.S. fieldbook for trenching activities log.

Depth Interval (ft bgs)	Description	Lab Sample ID*
Test Trench- UI-TT-17		
Ground Surface	Vegetated berm and slope into depression (suspected waste pit). Debris: woods planks and scrap metal from cars, appliances, tires, and cinder blocks	
0 - 3	Brown Silt and Sand, loose, low moisture, no odor/staining. Debris: tires, scrap metal, tires, plastics, paper, and wood debris.	NA
3 - 6	Dark grey Silty, Sandy mud, saturated, strong hydrocarbon, H ₂ S, and decayed organic odors. Mostly waste: rubber hose, plastics, scrap metal, strips of material, wood, pipe, and unidentified metal machine parts. Water table at 6' bgs.	NA
> 6	Same as above.	NA

Note: Trash is 6' thick in crest of berm, and slopes into depression where waste is found below water table. Waste at depth could not be determined due to the water table. Area between berms in this area shakes and vibrates with the movement of the excavator similar to Pond E tire pit area. Trenching was photo-documented by Steve Scheidt and air monitoring conducted by Chad Kelly. Refer to S.S. fieldbook for trenching activities log. * No soil waste or leachate samples collected from UI-TT-17.

Description

Lab Sample ID

Test Trench- UI-TT-32

Ground Surface	Vegetation. No surface debris observed.	
0-7	Poorly sorted, grayish brown Silt and Sand with some Gravel; loose, dry.	0.0

Notes: Dimensions: 17' long, 4' wide, 7' deep. No buried waste observed in Trench 32. Trenching was photo-documented Mike Morris. Air monitoring conducted by Chad Kelly.

Appendix E2 Soil Borings

SITE NAME/LOCATION:	J. M. Mills Landfill	RIG TYPE/METHOD:	Track mounted CMD55; 4.25" ID Hollow Stem Augers
WELL LOCATION:	Cumberland, Ri	GROUND SURFACE (GS) ELEVATION:	60.86 feet
LOGGED BY:	M. Morris/S. Scheidt	TOP OF CASING (TOC) ELEVATION:	63.83 feet
SIGNATURE:		DEPTH OF WELL FROM TOC:	23.18 feet

Materials	Construction Diagram	Dimensions (Feet)	Depth (Ft Below GS)	Elevations (Ft Above Datum)	
		Top of Riser	-3.0	63.83	
Surface Materials: Above ground , steel, 6" diameter stand pipe with a locking cap in a 2.5' by 2.5' concrete pad. Water tight expansion plug cap at top of riser.		Ground Surface	0.0	60.86	
		Top of Seal	2.0	58.82	
Annular Seal: Hydrated Pure Gold® Medium Bentonite Chips					
		Top of Sandpack	6.5	54.32	
Filter Pack: #2 Quartz Filter Sand		Top of Screen	10.0	50.82	
Well Riser: 2" Diameter PVC Schedule 40					
Well Screen: 10 Slot (0.010 inch) 2" Diameter PVC Schedule 40					
Bottom Cap: 2" PVC End Cap		Bottom of Screen	20.0	40.82	
Borehole Diameter: 8.5 Inches		Bottom of Well	20.2	40.65	
Comments: Well developed on 9/23/03 by surging and pumping approximately 55 gallons of water using an electric submersible pump.
